

## QUICK GUIDE FOR AIR IMPORTS

**General Objective:** Explain in a fast and accurate way the basic steps for Air Imports. Finalizing the process with the transference to the Accounting Bridge of the files created on the module for the generation of statistics and accounting reports.

### Basic Steps

|                                |                                                                                                         |
|--------------------------------|---------------------------------------------------------------------------------------------------------|
| <b>1-File</b>                  | This is the first step in order to create an Import Shipment or Import Airwaybill.                      |
| <b>2-Airwaybill Entry</b>      | Generates Airwaybills according to the information received of the shipment.                            |
| <b>3-Close File</b>            | Closes the files in order to be transferred to the Accounting Bridge.                                   |
| <b>4-File Analysis Report</b>  | Generates a Report which allows the user to verify the billing and cost values before the transference. |
| <b>5-Update to Acct Bridge</b> | During this step are transferred to the Accounting Bridge the files previously closed.                  |

### Air Import – Module Workflow

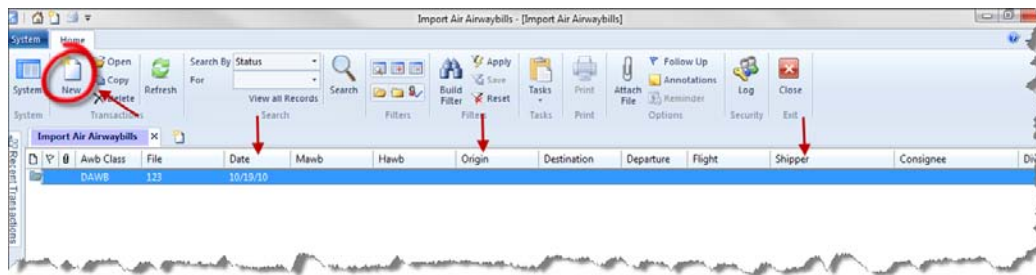

### 1-File

When this step is selected if is not your first Air Import file in the system, will appear on the screen a list of all the files previously created which can be arranged in a ascending or descending order by clicking on the different fields located on the top bar as shown bellow.

## Window #1

The creation of files starts with the window#2 which will show at your screen after clicking on the New (  ) icon located in the **Home Tab (Window#1)**. For a faster procedure only fill out the basic information in order to generate the Airwaybills. You may use the magnifying glass (  ) to make searches, additions, deletions and updates.

|                                                  |                                                                                                                                                   |
|--------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1-Shipment Type</b>                           | Select from the dropdown box if the Import is a <b>Direct</b> or a <b>Consolidation</b> shipment.                                                 |
| <b>2-File Number</b>                             | Is generated by the system automatically, with this number will be created the Airwaybills based on the information included on the <b>File</b> . |
| <b>3-Awb Number</b>                              | AWB# received.                                                                                                                                    |
| <b>4-Carrier/Flight</b>                          | Carrier and Flight details.                                                                                                                       |
| <b>5-Totals</b>                                  | Total of: Houses, pieces, weight, chargeable weight.                                                                                              |
| <b>6-Origin</b>                                  | Origin of the Shipment.                                                                                                                           |
| <b>7-Destination</b>                             | Ultimate destination of the Shipment.                                                                                                             |
| <b>8-Shipper</b>                                 | Name of the Shipper as is shown in the Commercial Invoice. If there is more than one shipper can be added through step #2.                        |
| <b>9-Consignee</b>                               | The recipient of the shipment at destination.                                                                                                     |
| <b>10-Broker</b>                                 | Broker details.                                                                                                                                   |
| <b>11-Import Information&amp; Cargo location</b> | Includes entry reference numbers and details of Cargo location.                                                                                   |

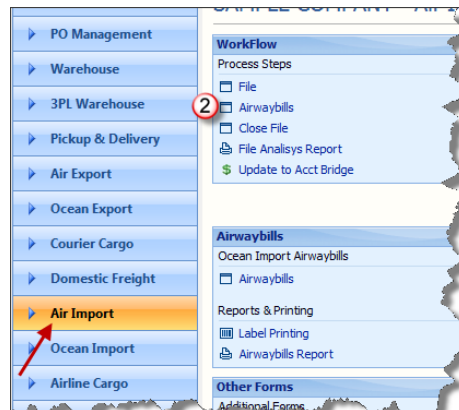

## Cont. Window#2

## Import Air File

After entering the information it must be saved in order to generate the File Number.( See window bellow)

## 2-Airwaybill Entry

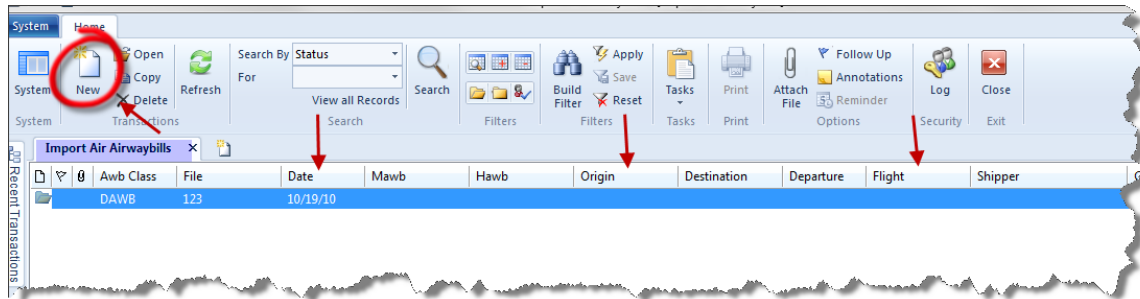

When this step is selected if is not your first Air Import Airwaybill in the system, will appear on the screen a list of all the Airwaybill previously created which can be arranged in a ascending or descending order by clicking on the different fields located on the top bar as shown below.

### Import Airwaybill

#### Window#3

The creation of Airwaybills starts with the window#4 which will show at your screen after clicking on the New (  ) icon located in the **Home Tab (Window#4)**. You may use the magnifying glass (  ) to make searches, additions, deletions and updates.

By typing or looking up (  ) the File Number previously generated, the information included in the File will update automatically the Airwaybill that is being created.

### Import Airwaybill – New Record ( )

#### Window #4

|                        |                                                                                                                                                                                                |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1-Shipment Type</b> | Select from the dropdown box the Type of AWB that is being created, if it a consolidation shipment, you should start always for the Mawb and then create the House(S).                         |

|-----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1-Billing Code</b> | Using the magnifying glass select the respective Billing Code of the service or material to be paid.                                                                                                                                  |
| <b>2-Bill Type</b>    | Select from the dropdown box if the bill type is: Prepaid / Collect.                                                                                                                                                                  |
| <b>3-Bill Party</b>   | Choose from the dropdown box who will be responsible for the Charges (Shipper/Consignee/Other).                                                                                                                                       |
| <b>4-Billing</b>      | Within this Tab are included the Billing Charges. If under <b>Bill Party</b> was selected <b>Other</b> you must look for the <b>Customer</b> responsible for the payment with the help of the magnifying glass (🔍). See window above. |
| <b>5- Cost</b>        | Within this <b>Tab</b> are included the Cost Charges. With the help of the magnifying glass you must find the Vendor ID for each specific Cost Charge.                                                                                |
| <b>6-OK</b>           | Saves and Closes the window updating the AWB with the new charges details.                                                                                                                                                            |

### Cont. Window#4

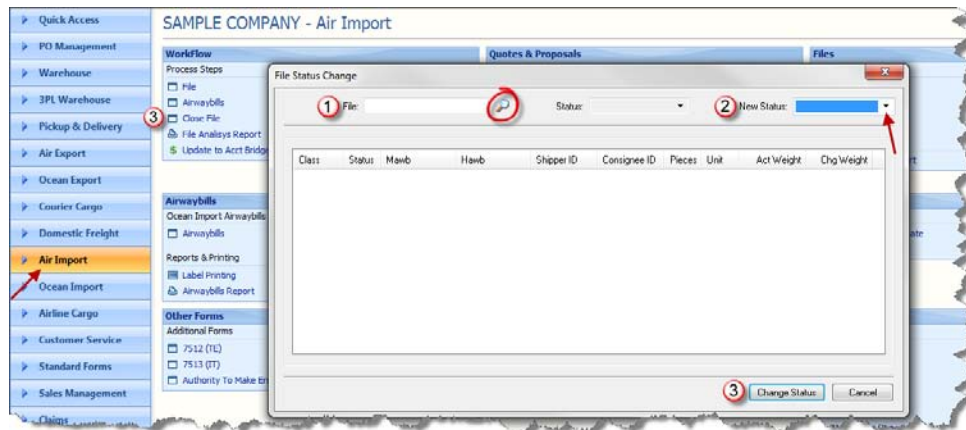

|                           |                                                                                                                       |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------|
| <b>1-Invoice</b>          | This option will allow you to generate the Invoices.                                                                  |
| <b>2-Print</b>            | By clicking this option you will be able to print the different forms and formats that can be generated from the Awb. |
| <b>3-Save &amp; Close</b> | Saves and Closes the Awb window.                                                                                      |

### 3-Close File

During this section you will be able to close the file that will be transferred to the Accounting Bridge.

#### Window #5

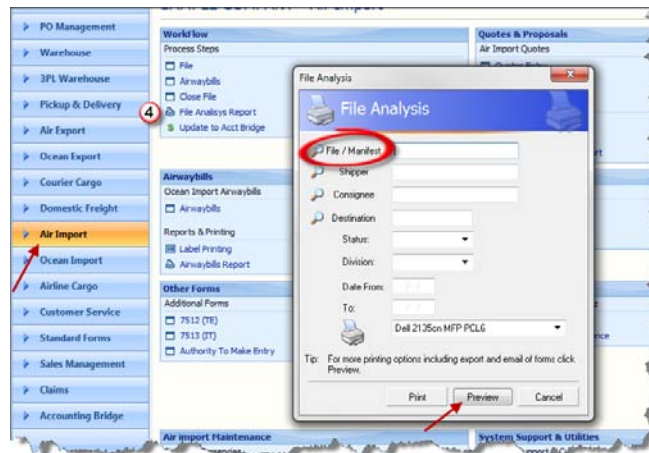

|                        |                                                                                                                                                                                  |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1-File</b>          | Type or look up the file # with the help of the magnifying glass. After <b>Tab</b> over, the Awb(s) included within the file will be shown on the screen.                        |
| <b>2-New Status</b>    | Select from the dropdown box the new status that will be assigned to the File, in order to transfer the transactions to the Accounting Bridge the status must be <b>Closed</b> . |
| <b>3-Change Status</b> | After the selection of the documents and the status by clicking here, this one will be automatically updated in the system.                                                      |

### 4 - File Analysis Report

During this step you will be able to verify the transactions within the File that is being transferred to the Accounting Bridge, if there is any error you could go back to the step # 2 to fix it.

#### Window#6

## 5 - Transfer to Acct Bridge

This is the last step of the workflow for the module **Air Import**, during this section you will proceed to transfer the **File** previously closed to the Accounting Bridge. See below **Window#7**.
