

Quick Guide for Pickup and Delivery Orders

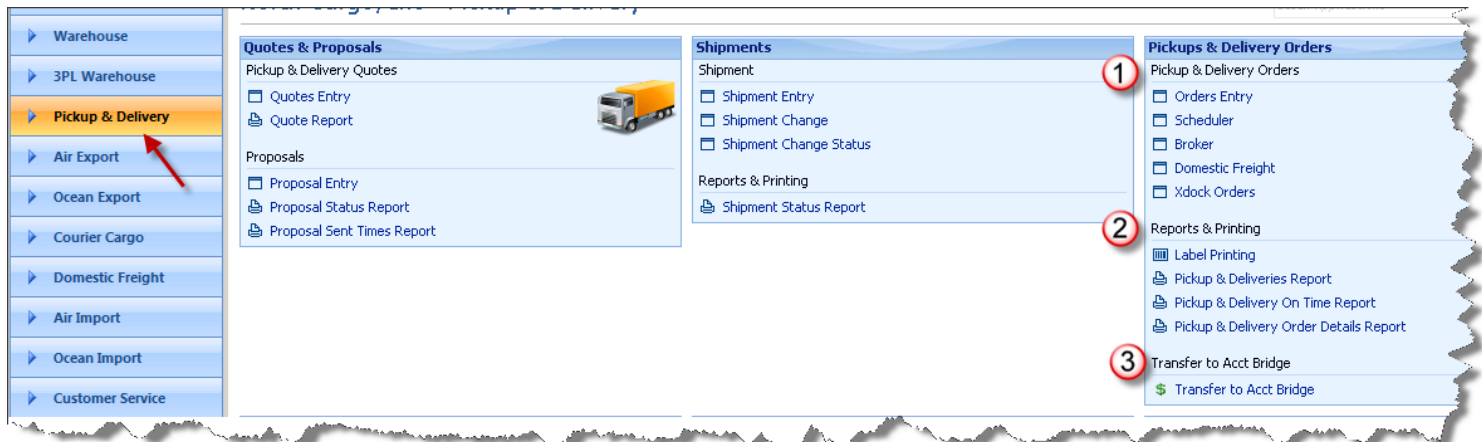

General Objective: Explain in a fast and accurate way the basic steps of the **Pickup and Delivery** Module workflow and its multiple options.

Main Sections

1-P/D Orders	This is the first section of the module, through it will be created the PD order and other types of domestic freight documents.
2-Reports & Printing	Through this section the user will be able to Print Labels and generate reports.
3-Transfer to Acct Bridge	Transference of PD Orders to Acct Bridge.

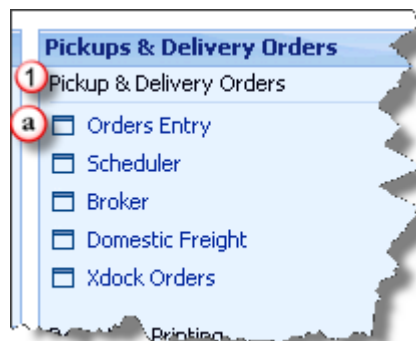

Window # 1

Pickup and Delivery Workflow

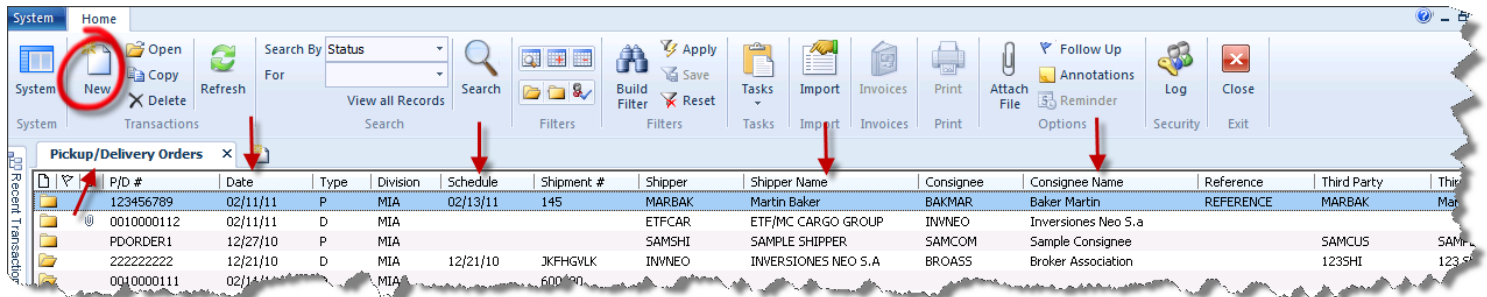

1- P/D Orders

a) Orders Entry

Once you click on the section as shown at the window # 1, a new list screen will appear showing all the P/D orders previously entered in the system. This list can be arranged in ascending or descending order, by clicking on the different fields found at the top of the **P/D Orders** tab. In order to create a new entry you must click on the *NEW* icon as shown on Window #2.

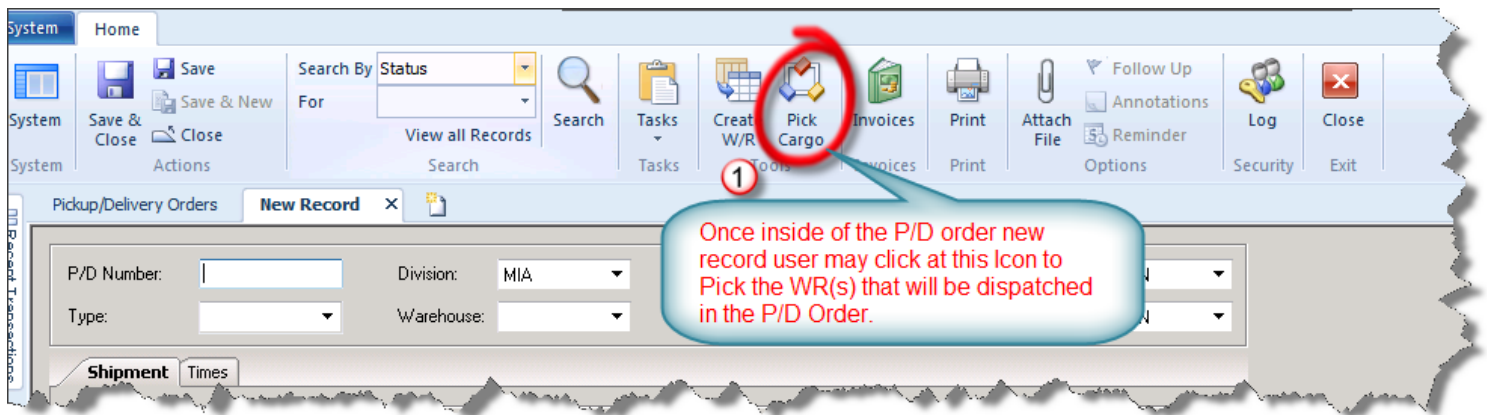

Window # 2

The P/D entry starts with the window#3 which will show at your screen after clicking on the New () icon located in the **Home Tab (Window#2)**. The user may use the magnifying glass ( Search) to make searches, additions, deletions and updates.

Window#3

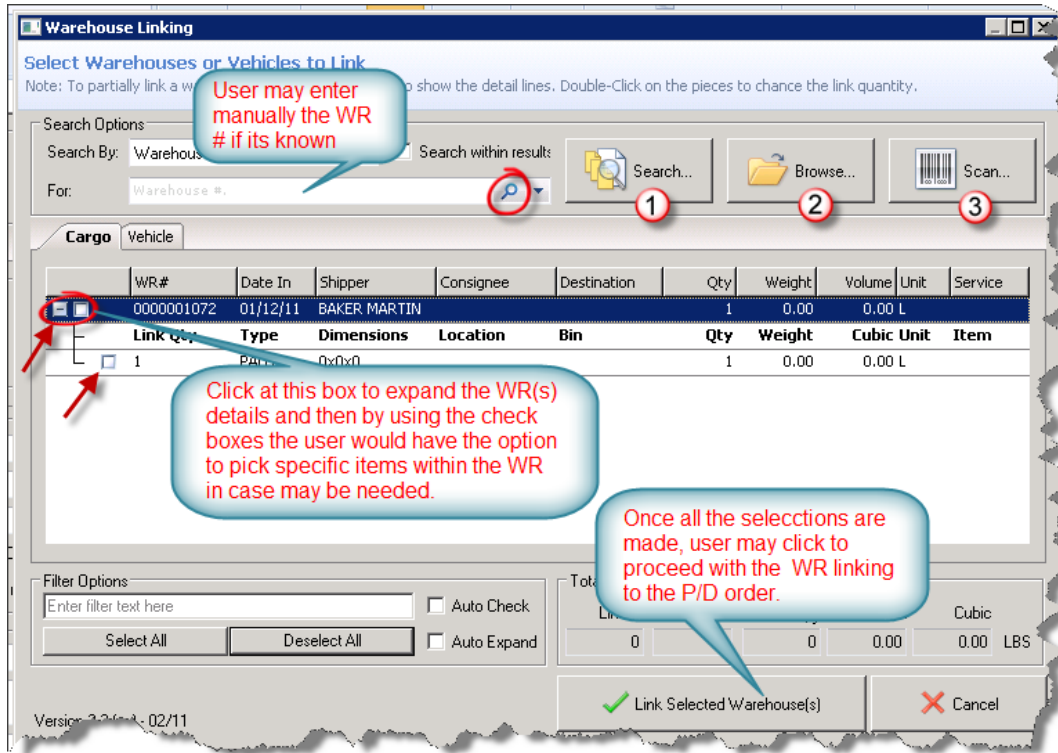

P/D Order– New Record (New)

***** Once the user clicks at the previous Icon shown, a new linking window will prompt at the screen with options to search for the WR (s). See more details below.**

Window # 3.1

1-Search

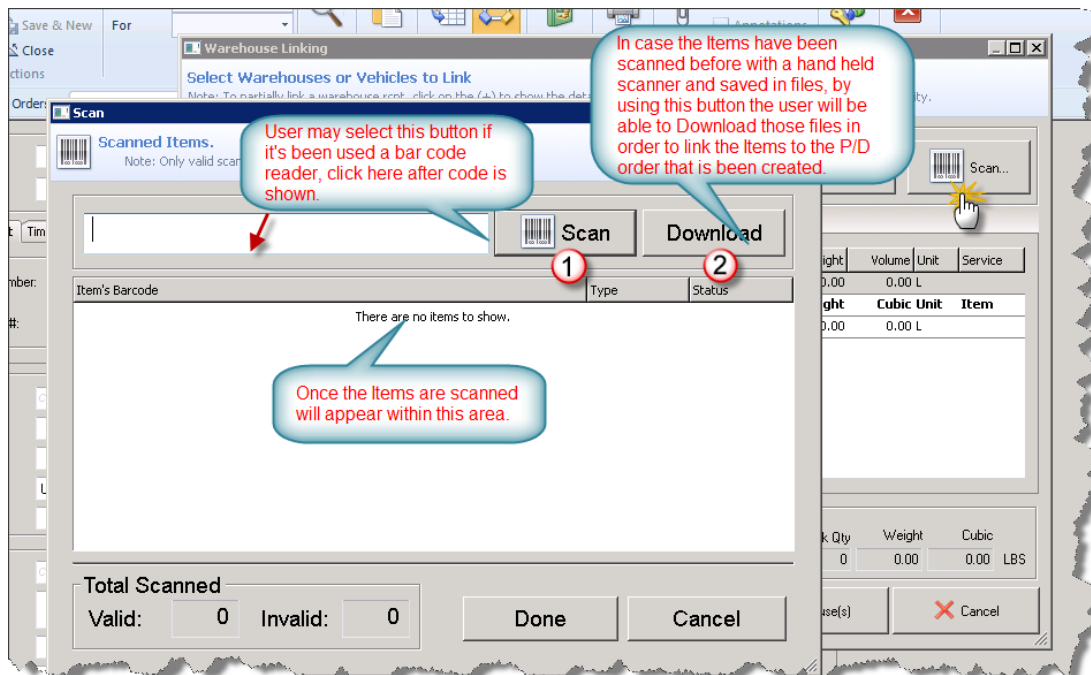

Use this button if the WR # has been entered manually.

2-Browse

By using this button the user will be able to browse for the specific WR # at the WR's screen.

3-Scan

This option will be used if the cargo will be picked physically either by using barcode readers or other type of scanning device. See following window for more details of this button.

Cont. Window #3.1

1-P/D #	The P/D number is generated automatically by the system once the information entered in this window is saved.
2-Type	Using the dropdown box select the type of order that is being created, Xdock, exchange, pickup, delivery or quote.
3-Warehouse	Using the dropdown box select the warehouse which the P/D it's being created from.
4-Shipment	This tab includes different shipments reference numbers.
5-Times	This tab includes times and dates important on the handling process.
6-Quote #	In case for this Order has been previously created a quote and it's been approved the user may use the quote # in order to update the order with information included on the quote.
7-Shipping Instruction	If for this shipment has been created a Shipping Instructions by including its number the new P/D Order will be updated with the information contained within the SI.

Cont. Window# 3

1-Third Party	At this section will be included third party Information.
2-Additional Information	The user may use the different tab of this section.
3-Shipper	Shipper details and contact Information.
4-Consignee	Consignee details and Contact Information.

Cont. Window # 3

*** Through this section the Cargo Details are entered in the WR, the Tabs marked with numbers will be explained by separated windows for a better understanding.

Figure 1.a Cargo Details

*** For more detailed explanation of the different tabs within these two buttons (Cargo and Vehicle) please refer to Warehouse Receipt Quick Guide also available at our technical support website.
