

Ocean Export Quick Guide (OCEAN EXPORT - WORKFLOW)

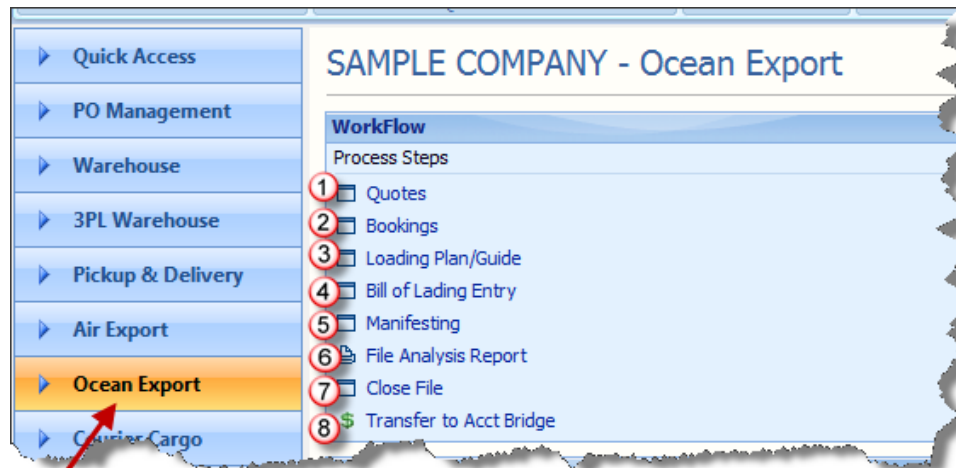

General Module Objective:

Explain in a fast and accurate way the basic steps in the preparation of documents to perform ocean export shipping. The process ends with the transfer to the module accounting bridge for the generation of reports and statistics.

Steps in module and its specific objectives

1-Quotes	This is an optional step in case the customer needs an estimate for a shipment.
2-Bookings	During this step is entered the booking confirmation # and also is generated the File # (Shipment Reference number).
3-Loading Plan/Guide	Guide to load the Containers.
4-B.L Entry	Generation of the Bill of Lading and its Printing Formats.
5- Manifests	Generates Manifests.
6-File Analysis Report	Generates a Report which allows the user to verify the billing and cost values before the transference.
7-Close File	Closes the files to be transferred to the Accounting Bridge.
8-Update to Acct Bridge	During this step are transferred to the Accounting Bridge the files previously closed.

Ocean Export – Modulo Workflow

1- Quotes

During this step it can be generated a quote from Origin to final destination. If the quote is approved by the Customer, the BL would be updated with the information previously included by introducing the Quote #. Once the user click "Quotes" on the main page, a new window will prompt on the screen. In order to create a Quote click on The Icon **New** Located within the **Home** bar.
