

QUICK GUIDE FOR OCEAN IMPORTS

General Objective: Explain in a fast and accurate way the basic steps for Ocean Imports. Finalizing the process with the transference to the Accounting Bridge of the files created on the module for the generation of statistics and accounting reports.

Basic Steps

1-File	This is the first step in order to create an Ocean Shipment.
2-Bill of Lading	Generate BL according to the information received of the shipment.
3-Close File	Closes the files in order to be transferred to the Accounting Bridge.
4-File Analysis Report	Generates a Report which allows the user to verify the billing and cost values before the transference.
5-Update to Acct Bridge	During this step are transferred to the Accounting Bridge the files previously closed.

Ocean Import – Module Workflow

1-File

When this step is selected if is not your first Ocean Import file in the system, will appear on the screen a list of all the files previously created which can be arranged in a ascending or descending order by clicking on the different fields located on the top bar as shown bellow.

Windows # 1

The creation of files starts with the window#2 which will show at your screen after clicking on the New () icon located in the **Home Tab (Window#1)**. For a faster procedure only fill out the basic information in order to generate the File #. You may use the magnifying glass () to make searches, additions, deletions and updates.
